

US to zero growth by September.

The US stock market's quarterly earnings period has now come to a close, and in summary it can be seen that profits overall rose by 4.3%. However, excluding the top seven well-known companies, the rest of the market shows a decline of around 2%, confirming the fifth consecutive quarter of profit contraction for 99% of listed companies. All this is happening against a 'official' backdrop of economic growth, rising consumption, full employment and generalised price increases by Corporate America.

Too many things don't add up...
