

# Lemanik SIM opens in Milan

Lemanik SIM S.p.A., the new Italian company of Lemanik Group, led by Marco Sagramoso (CEO), has been operating in Milan since July 1, 2023.

Lemanik has opened its new company in Milan. The group with offices in Dublin, Milan and Hong Kong has already been distributing **Lemanik Sicav funds** in Italy for more than twenty years. The objective is to further develop the activities of placement of financial instruments in Italy.

*Lemanik Sicav is driven by a boutique approach and offers specialized investment solutions.*

At a time when we need to find a positive allocation for liquidity by containing volatility, we can draw on **Lemanik Active Short Term Credit**. An ultra-short-term high yield bond fund that invests in a low-risk, low-volatility and correlation portfolio and is therefore composed of securities that have little influence on each other, so as to preserve the invested capital as much as possible. Lemanik also focuses on **Lemanik Selected bond**, a fund that aims to achieve a constant return over time, with a total return approach and allows you to integrate the bond component of the portfolio with a segment of securities that offers returns consistently above the market average.

It also offers the **Lemanik High Growth** segment, one of the best in its three-year category in terms of risk-return ratio that invests in a targeted manner on the Italian Stock Exchange, benefiting from the performance of the best stocks, both in the Blue chip segment and in that of mid-cap companies and operates a careful selection of securities in the portfolio, thanks to the direct relationship with the management of target companies.

**Lemanik Group is always attentive to sustainability.** The products distributed by the new SIM comply with the Esg criteria and adopt investment policies consistent with the principles of ethical correctness of the company.

*80% of Lemanik funds were already compliant with the criteria of the European Sfdr Regulation (Sustainable Finance Disclosure Regulation) before their classification according to art. 8 Sfdr.*

**Emilio Foglia**, Manager of the placement of Lemanik SIM s.p.A underlines the importance of having opened its SIM in Italy: “as evidence of the centrality of Italy for the strategies of the group for over two decades, we have launched an **Italian securities brokerage company** in Milan to intensify and further develop the activities of placing financial instruments in the country and ensure maximum transparency and effectiveness”.

**Foglia** also adds what is the goal pursued by Lemanik: “to consolidate the recognition of the Group and its products in an increasingly competitive environment, with a portfolio of original products, which, in order to differentiate themselves from competitors, pursue quality efficiency and continuity of returns, with careful risk management. Within this common framework, each operator operates in **total independence**, aiming to generate performance in all market conditions”.
