Lemanik webinar with Maurizio Novelli, Senior Portfolio Manager

Crisi Bancarie e Ciclo del Debito

Lemanik webinar | Maurizio Novelli | Thursday 20 April at 11 a.m. CEST

The **banking crises** of recent weeks have once again highlighted the **fragility of the global financial system** due to the adoption of overly **expansive monetary policies for too long**.

Despite the reassurances of Christine Lagarde and ECB chief economist Philip Lane, the effects of the recent crises have not been fully analyzed and the underlying causes are much **more complex than they seem**.

Thus, what are the systemic risks emerging from these banking events? And what are the implications for the U.S. and eurozone economies?

We will be trying to answer these questions with Maurizio Novelli in a dedicated webinar on **Thursday, April 20 at 11 a.m.**
Introduced and moderated by Fabio Reali.

Meeting reserved for industry professionals only.

Held only in italian.
