Panel discussion. Our Asia Pacific Managing Director Alessandro Silvestro at SuperReturn China

All eyes on China: where are the most attractive investment opportunities in China's private markets?

How will recent regulatory developments and US-China relations impact allocations from international LPs? Where are the most appealing opportunities in China's private markets? Where does ESG and sustainability fall on the list of priorities? Supply chain disruptions, real estate turbulence and China's Common Prosperity initiative; how should LPs and GPs position themselves to navigate these opportunities?

Our Managing Director Asia Pacific, **Alessandro Silvestro**, will moderate a panel dedicated to these topics on May 11 at the SuperReturn China virtual event along with other industry

leaders.
